Art Unit: 2853

DETAILED ACTION

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Priority

- 2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-
- (d). The certified copy has been filed in parent Application No. 08/518,730, filed on 8/24/95.

Drawings

3. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Serial Number: 08/796,519 Page 3

Art Unit: 2853

Specification

4. A substitute specification excluding claims is required pursuant to 37 CFR 1.125(a) because of the lengthy amendment filed 2/6/97.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-8 and 35-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the recitation of "a air vent" should read "an air vent". Also in claim 1, the recitation of "for fluid communication with ambience" is vague and indefinite because it is unclear

Page 4

Serial Number: 08/796,519

Art Unit: 2853

as to what "ambience" refers to. Also in claim 1, it is unclear as to where "a second side opposite from said ink container" is located.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-8 and 35-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirabayashi et al. in view of Kotaki et al.

Hirabayashi et al. discloses an ink container comprising: an ink supply port (8a) for supplying ink to an ink jet head; an air vent (3a); a claw-like projection (6a) on a first side of said ink container; and a latching lever (103a) provided opposite from said ink container, said latching lever being resiliently supported on said ink container and having a latching claw. However, Hirabayashi et al. does not disclose a top portion of the ink container has a stepped portion. Kotaki et al. discloses an ink container having a top side which has a stepped portion. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide an ink container having a top side which has a stepped portion, as taught by Kotaki et al., in the ink container of Hirabayashi et al., in order to facilitate insertion and removal of the ink container.

Serial Number: 08/796,519

Art Unit: 2853

9. Claims 9-34 and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Hirabayashi et al. in view of Kashimura et al.

Hirabayashi et al. discloses an ink container holder comprising: an opening for receiving

an ink container; an ink receiving tube (15a) for receiving ink; a first internal wall having a first

engaging hole (16a) for engagement with a claw-like projection (7a) of the ink container; and a

second internal wall having a second engaging hole (17a) for engagement with a latching claw

(5a) of a latching lever of the ink container. However, Hirabayashi et al. does not disclose a

projected portion for covering a part of said opening. Kashimura et al discloses an ink container

holder having a projected portion (10) for covering a part of an opening. Therefore, it would

have been obvious to one of ordinary skill in the art at the time of the invention to provide a

projected portion covering a part of an opening, as taught by Kashimura et al., in the ink container

holder of Hirabayashi et al., in order to elongate the life of the device.

10. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Craig Hallacher whose telephone number is (703) 308-0516.
